About Me

BSIT student at St. Dominic College of Asia with a strong interest in software development, web technologies, and IT systems. Comfortable working in team environments and under pressure, with a track record of continuous upskilling through certifications in web development and office tools. Seeking opportunities to apply technical skills to real-world projects while growing professionally in the IT field.

Education

Bachelor of Science in Information Technology St. Dominic College of Asia — Emilio Aguinaldo Hwy, Bacoor, Philippines 2025 – Present

- Relevant coursework: Programming, Web Development, Database Management, Software Development

Information and Communication Technology (Senior High School) St. Matthew Academy of Cavite — Little Pasay St. Niog 1, Bacoor, Philippines 2017 – 2023

- 4th Curricular Awardee
- Leadership Award — 24-Hour Coding Hackathon
- Project Manager — Overall Champion Hackathon Team

Projects & Experience

grAIn — AI-Powered Full-Stack Application | TypeScript · Next.js · Node.js · AI

- Developed a full-stack AI-powered product with a Next.js frontend and a dedicated Node.js backend, using TypeScript throughout for type safety.
- Designed RESTful API endpoints and integrated AI features to deliver seamless digital experiences.

Hogwarts Treasury — Themed E-Commerce Website | HTML5 · CSS3 · JavaScript

- Built a Harry Potter-inspired e-commerce website during a 24-hour coding challenge, combining themed visual design with a functional online shopping experience.
- Implemented responsive frontend using only HTML5, CSS3, and JavaScript (no frameworks).
- Team role: Frontend Lead / Full-Stack Developer — delivered a complete shopping UI under a strict 24-hour deadline.

ScentryX — Backend Service | Node.js · Express · JavaScript

- Developed backend services for the ScentryX platform using Node.js and Express.
- Designed server-side logic and API routes to support platform functionality.

Student Schedule Tracker — Mobile App | Flutter · Dart · Firebase

- Built a mobile app that helps students track subject schedules and navigate classes easily using Flutter and Firebase.
- Integrated Firebase for real-time data storage and authentication.

Skills

Technical: Java, Python, C, HTML, CSS, Android Development, Database Management, Microsoft Office, Troubleshooting
